

# Clean´n Coat

## PRODUCT FEATURES

- Special product for preparation of a finished surface for recoating with the 2K water borne finish CompoAvenue or Genuine.
- Works on all Arboritec water borne finish. On other finishes an easy sample should be prepared.
- Clean´n Coat is not suitable to be used for cleaning without overcoating.

## PREPARATION

Daily cleaning on wooden floors should be carried out using dry cleaning methods, e.g. dry mopping and vacuuming. Before using Clean´n Coat remove all loose particles which might scratch the surface.

## REQUIREMENTS for recoate system:

- The floor was finished with a Arboritec finish. Other finishes can be recoated after an easy sample is prepared (see below).
- The varnish is not worn out down to bare wood.
- The floor has not been treated with wax or polish.
- Damages or scratches which go through the varnish have to be sealed carefully

Recoating of unknown water borne varnish and UV-coated parquet is possible. In this case and if the floor earlier has been maintained with polish or wax a sample area has to be prepared:

## ADHEASION TEST

Choose a little spot at a unremarkable part of the floor. Treat it as described below. Cut the finish carefully with a knife and try to peel off the finish from the cut. If the finish film does not detach, the whole floor can be recoated. If the finish can be peeled off we do not recommend to recoat the floor.

## APPLICATION

Clean´n Coat is sprayed directly onto the floor. The concentrate is diluted 1:20 in water (50ml on 1l of water). Disperse using a mop and buff the floor with white, red or green pad – depending of age of the floor and kind of impurities. Rinse carefully with clear water and a mop.

Let the floor dry completely.

Apply Clean´n Coat a second time and let it dry.

Seal the floor with 2 layers of CompoAvenue or Genuine.

**NB:** Never pour water directly onto wood or laminate floors, instead use a damp cloth or floor mop and remove excess water immediately.

## HEALTH AND ENVIRONMENT

Clean´n Coat is not classified as hazardous to your health or the environment. Precautions common for handling any chemical products should be taken. For further information, please refer to the Material safety data sheet.

## TECHNICAL DATA

<b>Contents:</b>	Solvents (<2% ´) and water
<b>pH:</b>	Approx. 7
<b>Dilution of concentrate:</b>	5% (50ml in 1l water)
<b>Storage:</b>	Best before 3 years in unopened container from date of production at +5- 25°C. Store free of frost. Keep out of reach of children.
<b>Package:</b>	10x0,75 Liter plastic can (Clean´n Coat Spray) 6x1 Liter (Concentrate)
